

Course policies

The Academic Affairs committee proposes that the Faculty Council develop a webpage that contains statements and/or links to pages stating university-wide policies regarding courses. We have been asked to *require* that *every* course syllabus contain statements regarding various university-wide policies. These include disabilities, religious holidays, final exams, course length, academic integrity and others. Most of these subjects are covered by existing policies but the policy statements are often difficult to find. Instructors and students are often unaware of the existing policies. A reference to this page on each syllabus would benefit students and instructors. Such a page would particularly benefit new faculty and temporary or part time instructors.

The page would include the following topics and others.
